For the sake of argument, consider that the flow is as the diagram shows. As some have noted, this flow is compromised relative to a more logical configuration due to the Miata using an engine intended for a front/all wheel car. Consider a small restrictor opening. Less water goes through the radiator, so clearly you aren't going to get much ...

It is designed for Flyin' Miata turbo kits but should be compatible with most Garrett turbos regardless of source. If you have an MSM with the stock turbo, be sure to choose the MSM-specific kit, but if you have a non-stock turbo on a MSM engine you need the standard (not stock MSM turbo) connection kit.
