Project Gutenberg is a charity endeavor, sustained through volunteers and fundraisers, that aims to collect and provide as many high-quality ebooks as possible. Most of its library consists of public domain titles, but it has other stuff too if you're willing to look around.

Applying Manufacturing Execution Systems Resource

Applying Manufacturing Execution Systems shows how MES benefits all types of manufacturing from discrete item production to process flow production. The concepts discussed are applicable in all production facilities where a number of variables, whether simple or complex, need to be considered in order to optimize production by effectively using the available resources of people, inventory, and equipment.

Applying Manufacturing Execution Systems

Presenter: Bianca Scholten Length: 90 Minutes
Every enterprise that manufactures anything has some sort of manufacturing execution system (MES)--some means of tracking what needs to be done and how it gets done. Whether it's effective or not depends on its ability to provide structure and control, visibility and accountability, and support for the kind of flexibility and responsiveness demanded ...
