INSTALLATION MANUAL

Autopilot and automatic trim operating airspeed limitations (if any) will be specified on the operation placard or in the flight manual supplement. The Century III servo mechanisms are designed with a fail safe electric engage and disengage features. The autopilot may also be overridden by the pilot without damage to the system.

CENTURY III

The Piper Altimatic X (10) became the Century IV and filled the role of a full-featured autopilot with Flight Director for the heavier Piper twins. Century Flight Systems went on to produce the Century 21, 31, 41, and later, the Century 2000 and Trident models. You can sometimes find these retrofitted in later Piper models.

Everything You NEED TO KNOW about Piper "Legacy" Autopilots

2. Be wary of using automatic pitch trim. The Century manual says it is important, but it can also be dangerous. If you suffer a reduction in engine power when you have pitch mode or altitude hold mode selected, the autopilot will trim back. The same can also happen if you get a failure in the autopilot system (or it could trim full forward).

The Century IV is a two or three axis autopilot with a vintage in the mid 70's. If properly maintained, it is a very capable autopilot. It can interface to an HSI, has an option for a single que flight director, and can have an optional yaw damper. It has all angle intercept capability for an approach and will also intercept and track a GS.

Any problems with Century IV autopilot? - ABS

Seems the female connectors used throughout the Century autopilots, particularly the III and IV, are prone to spreading, making electrical contact intermittent. Finally, Rogers says, "In the Cessna/ARC systems, it is usually that a component has been replaced but the system hasn't been aligned on the bench.
