acceleration of Building 1 (denoted by  $z_1$  and  $a_1$ ) are considered as the responses of interest for illustration purposes. To validate the accuracy of the proposed method, the time-dependent variances of  $z_1$  and  $a_1$  as well as the covariance between  $z_1$  and  $a_1$  obtained using the MCS, ESM, and SD-EIM are compared in Fig. 3. The ETDM gives only the

The Information Age was founded on the semiconductor revolution, marked by the growth of high-purity semiconductor single crystals. The resultant design and fabrication of electronic devices exploits our ability to control the concentration, motion, and dynamics of charge carriers in the bulk semiconductor solid state.
