1 Overview of Color and Mastering for Digital Cinema In June of 1999, George Lucas released his film “Star Wars: Episode 1” on two digital cinema screens—one in New York and one in Los Angeles. In the five years since this historic debut, over 150 films have been released digitally to over 500 screens in 30 countries around the world.

1. Overview of Color and Mastering for Digital Cinema ...

The color wheel is the basis of color theory, because it shows the relationship between colors. Colors that look good together are called a color harmony. Artists and designers use these to create a particular look or feel. You can use a color wheel to find color harmonies by using the rules of color combinations.

Color wheel - color theory and calculator | Canva Colors

Colorfront is a world-class software development company in the field of high performance digital processing technologies for the motion picture industry. Colorfront supplies the most widely adopted digital dailies system used by leading Hollywood studios and post facilities on the top feature films and episodic television productions.

Colorfront

The word color is the general term which applies to the whole subject - red, orange, yellow, green, blue, violet, black and white and all possible combinations thereof. Hue is the correct word to use to refer to just the pure spectrum colors. Any given color can be described in terms of its value and hue.
