This is the second part of a Guide to Ceramics, written by ceramicist Kevin Andrew Morris. Part One covered the essentials of working in ceramics, whilst this guide will cover ceramic finishing, surface and decoration techniques.. Ceramics have a range of surface, decorative and finishing techniques that can be used at different stage of production.

**Guide to Ceramics - part two | Make Works**

Advanced production techniques are employed to assure that the produced ceramic powders possess sufficient purity. Generally chemical reactions are used to produce the ceramic powder such as Sol-gel processing and liquid-gas reactions like NH<sub>3</sub> gas and SiCl<sub>4</sub> liquid to produce Si<sub>3</sub>N<sub>4</sub>. Many of these methods are very costly.

**What are Ceramic Materials and Their Uses? - Bright Hub ...**

There are many forming techniques to make ceramics, but one example is slipcasting. This is where slip or, liquid clay, is poured into a plaster mould. The water in the slip is drawn out into the walls of the plaster mould, leaving an inside layer of solid clay, which hardens quickly. When dry, the solid clay can then also be removed.
