This paper examines the role of multinational firms in international trade using firm-level panel data for Japanese firms between 1994 and 2000. Our results indicate that multinational firms dominate Japanese trade. In 2000, only 12.4 percent of Japanese firms were multinationals but they accounted for 93.6 and 81.2 percent of Japanese exports and

#### The Role of Multinational Firms in International Trade ...

Using a sample of world's largest firms and their foreign subsidiaries, this paper shows that the extent of state presence in various countries and economic sectors is significant. Moreover, many of the countries with the highest SOE shares and economic sectors with strong SOE presence are intensely traded.

Heterogeneous Firms and Trade Marc J. Melitz and Stephen J. Redding NBER Working Paper No. 18652 December 2012 JEL No. F10,F12,F14 ABSTRACT This paper reviews the new approach to international trade based on firm heterogeneity in differentiated product markets. This approach explains a variety of features exhibited in disaggregated trade data,

### **Heterogeneous Firms and Trade - Princeton University**

Banks play a critical role in international trade by providing trade finance products that reduce the risk of exporting. This paper employs two new data sets to shed light on the magnitude and structure of this business, which, as we show, is highly concentrated in a few large banks. The two principal trade finance instruments, letters of ...

This paper provides a broad overview of some of the issues that digital trade raises for ASEAN countries and its MSMEs, including new opportunities that digitalisation presents for ASEAN firms to increase trade. However, it shows that adoption of...

### **OECD iLibrary | OECD Trade Policy Papers**

This paper develops a simple model of international trade with intermediation. We consider an economy with two islands and two types of agents, farmers and traders. Farmers can produce two goods, but to sell these goods in centralized (Walrasian) markets, they need to be matched with a trader, and this entails costly search.

Abstract. Financial market imperfections severely restrict international trade flows because exporters require external capital. This article identifies and quantifies the three mechanisms through which credit constraints affect trade: the selection of heterogeneous firms into domestic production, the selection of domestic manufacturers into exporting, and the level of firm exports.

This paper examines the detrimental consequences of financial market imperfections for international trade. I develop a heterogeneous-firm model with countries at different levels of financial development and sectors of varying financial vulnerability. Applying this model to aggregate trade data, I study the mechanisms through which credit ...

### **Credit Constraints, Heterogeneous Firms and International ...**

The ongoing process of international economic integration has induced several academic researchers and policy makers to deepen increasingly issues about the relationship between international trade and economic growth. More in particular, the attention is increasingly focusing on the link between exporting and firm performance, acknowledging the extreme relevance of 'firm heterogeneity'.

Downloadable! In this paper, we estimate firm-level markups and test some micro-level predictions of a model of international trade with heterogenous firms and endogenous mark-ups. Our theoretical framework is an extended version of the Melitz and Ottaviano (2008) (MO) model which features both quality and spatial differentiation across firms.
