First V8 Engine

A V8 engine is an eight-cylinder piston engine in which the cylinders share a common crankshaft and are arranged in a V configuration.. The first known working V8 engine was produced by the French company Antoinette in 1904 for use in aircraft, and the 1914–1935 Cadillac L-Head engine is considered the first automotive V8 engine to be produced in significant quantities.

V8 engine - Wikipedia

Frenchman Leon Levavasseur was a 39-year-old inventor in 1902 when he took out a patent for the first V-8 engine he called the Antoinette. The V8 since then has become the most reliable and efficient internal combustion engine to power automobiles and to see extensive use in power boats and early aircraft.

Who Invented the V8 Engine? | It Still Runs

The Ford flathead V8 (often called simply the Ford flathead, flathead Ford, or flatty when the context is implicit, such as in hot-rodding) is a V8 engine with a flat cylinder head designed by the Ford Motor Company and built by Ford and various licensees. During the engine's first decade of production, when overhead-valve engines were used by only a small minority of makes, it was usually ...
