Horticultural therapy - Master Gardeners of Middlesex ...

Horticulture is the art and science of growing plants. Horticultural therapy is the practice of engaging people in plant or gardening activities to improve their bodies, minds, and spirits. Research confirms that healthful benefits accrue when people connect with nature and plants by viewing and/or interacting with them. Figure 1.

ENH970/EP145: Horticultural Therapy

Social and therapeutic horticulture is the process of using plants and gardens to improve physical and mental health, as well as communication and thinking skills. Gardening is a wonderfully flexible medium that can transform lives and Thrive sees first-hand how gardening can help everyone, regardless of age or disability.

What is Social Therapeutic Horticulture? - Thrive

A horticulture student tending to plants in a garden in Lawrenceville, Georgia, 2015. Horticulture is the agriculture of plants, mainly for food, materials, comfort and beauty for decoration.

Horticulturists apply knowledge, skills, and technologies to grow intensively produced plants for human food and non-food uses and for personal or social needs.

Horticulture - Wikipedia

Horticulture as Therapy, a thorough and comprehensive volume, teaches how HT can be used with different populations in a variety of settings, what resources are available, effective treatment strategies and the concepts behind horticultural treatment.

Publications - Horticultural Therapy Institute

And Planting Therapy is the most popular way. Moreover, it can help create a positive mood and reduce stress. As a coping mechanism, planting therapy helps achieve success and recovery in the long run. Indeed, caring for plants is good therapy. Principles of Planting Therapy. Ideally, Planting Therapy is based on certain principles:

Planting Therapy | What's it all about? | Vibrant Horticulture

Horticultural therapy (also known as social and therapeutic horticulture or STH) is defined by the American Horticultural Therapy Association (AHTA) as the engagement of a person in gardening and plant-based activities, facilitated by a trained therapist, to achieve specific therapeutic treatment goals.
