For the extraction, testing and exhibits illustrated here, we used an iPhone 5s running iOS v. 11.2.6. Cellebrite Physical Analyzer v. 7.5 was used for the extraction and analysis. As mentioned later, location services must be turned ON with the device in order for this information to be logged, as detailed in the UFED Device Extraction Info below.

Forensics

From the Book iPhone Forensics The iPhone is a very useful tool, but you should be aware of some very important things. This book will shed some light about just how “private” a device like the iPhone really is. The iPhone is essentially a full-fledged computer, running a slimmed down version of the Unix operating system
