Information Regarding  
The Elements. If we  
take the top of the  
ceramic hob off we can  
give you an idea of  
what's going on inside.  
An element is quite  
simple, as it's  
essentially a resistive  
wire which has current  
passed through it and  
the resistance causes it  
to get hot - which is  
obviously what cooks  
the food.. As you can  
see here there are four  
rings inside the
