Neuromarketing

Neuromarketing, then, is most concerned with that second when the response is first formed. Once a consumer's brain is primed, new information/stimuli is introduced to allow the brain to compare this new information with what it already knows, and to form and express conscious opinions about the product itself.

Neuromarketing | What is Neuromarketing?

Advantages of Neuromarketing. The biggest advantage of neuromarketing is that it can fill in the gaps left by traditional marketing methods, because neuromarketing provides insight into situations where consumers say they want one thing, but then act (i.e., buy) in a different way.. Neuromarketing has an advantage because it: Does not rely on consumers to willingly and accurately report emotions,
