Occupational Therapy Intervention Process Model

The Occupational
Therapy Intervention
Process Model is a
model that guides
therapists to use top-
down, client-centered,
and occupational-
based approaches to
assessment and
intervention. In this

Download File PDF Occupational Therapy

model, assessment begins with an initial referral or a chart review. Therapists then meet and have an interview with clients in order to build the client-centered performance context and to gather relevant information and identify the clients' goals.

The Occupational
Therapy Intervention
Process Model (OTIPM)
(Fisher, 2009) is a
professional reasoning
model that
occupational therapists
can use to ensure that
we adopt an occupatio
n-centered(OC)
perspective to guide
our reasoning as we
plan and implement
occupation-based(OB)
and occupation-
focused(OF) services
(Fisher, 2013).
