What is Depth Psychology? | CG Jung Center

Carl Gustav Jung is perhaps the most famous dissident of classic psychoanalysis. He strayed away from Freudian ideas and explored ancestral roots and the collective unconscious and had many revolutionary ideas. One of them was the 12 Jungian archetypes of personality. To define his 12 archetypes of personality, Jung studied the symbols and myths of many different cultures.

The 12 Jungian Archetypes - Psychology - Exploring your mind

Jung's ideas have not been as popular as Freud's and his archetypes have not been viewed favorably in modern psychology. This might be because his work tended to veer into the mystical and pseudoscientific, and are therefore often studied more as a historical artifact and in realms of literary criticism and popular culture applications of mythology than as a major contribution to the science ...
