A 2011 University of Michigan study found that only 28 percent of American adults had enough scientific knowledge to be able to read The New York Times' Tuesday Science section and understand it. Admittedly, that's an improvement from a 1988 study, when only 10 percent of adults could make sense of the Times' science articles [source: ScienceDaily].

## 10 Science Questions You Should Really Know How to Answer ...

In the fields of science and engineering, the accuracy of a measurement system is the degree of closeness of measurements of a quantity to that quantity's true value. The precision of a measurement system, related to reproducibility and repeatability, is the degree to which repeated measurements under unchanged conditions show the same results.
