Wikibooks is a useful resource if you're curious about a subject, but you couldn't reference it in academic work. It's also worth noting that although Wikibooks' editors are sharp-eyed, some less scrupulous contributors may plagiarize copyright-protected work by other authors. Some recipes, for example, appear to be paraphrased from well-known chefs.

To Educate The Human Potential

A chapter is devoted to three psychological principles of the subconscious which are fundamental to the theory: (1) subconscious memory, the "mneme," which is specific to and built into each species; (2) Bergson's "Elan Vitale," or *Force*, a vital urge which drives every living creature in every activity of its life; and (3) the Association of Ideas, the principle by which most methods of education conceive that certain ideas must follow and build upon certain others, but is now, Montessori ...
